Document List

#	Document Number	File Name	Format	Source
	---	-----	-----	-----
1	VBF-T7R1MIMO-DS-01	design_spec.md	md	Design specification per deliverable-design-spec format
2	VBF-T7R1MIMO-DSH-01	datasheet.md	md	Technical datasheet per deliverable-datasheet format
3	VBF-T7R1MIMO-DVPR-01	dvpr.md	md	Design verification report per deliverable-dvpr format
4	VBF-T7R1MIMO-DFMEA-01	dfmea.md	md	Design FMEA per deliverable-dfmea format
5	VBF-T7R1MIMO-CALC-01	calc.xlsx	xlsx	Calculation sheet (openpyxl)
6	VBF-T7R1MIMO-BOM-01	bom.xlsx	xlsx	Bill of materials (openpyxl)
7	—	report.html	html	Full simulation report (bda render)
8	—	design_plan.md	md	Stage 1 design plan
9	—	log.jsonl	jsonl	Audit trail (all entries)

Notes

- ****BOM/CALC xlsx****: Generated as openpyxl workbooks (see generate_deliverables.py)
 - ****PDF releases****: Not generated in this session (headless, no reportlab export configured). MD sources are the primary deliverables.
 - ****CAD model****: Not requested in task (no 3D structure model needed for virtual battery factory).
 - ****Audit chain****: log.jsonl contains entry-0 criteria + plan + propose + funnel + evaluate + endorse + final entries. Every propose round has a same-round evaluate entry.
