

Delivery Index — ArchF Drone Battery

Cover Information

Field	Value
Case Name	t8_r1_mimo
Case ID	T8R1MIMO
Generation Date	2026-08-31
Prepared By	[blank — for manual signing]
Reviewed By	[blank — for manual signing]
Approved By	[blank — for manual signing]

Document Numbering Scheme

`VBF-T8R1MIMO-<DOC-CODE>-<SEQ>`

File List

#	Document Number	File Name	Format	Source / Description
1	VBF-T8R1MIMO-DS-01	design_spec.md	md	Design specification generated per deliverable-design-spec format
2	VBF-T8R1MIMO-BOM-01	bom.xlsx	xlsx	Bill of materials from parameter set mass calculation
3	VBF-T8R1MIMO-DSH-01	datasheet.md	md	Technical datasheet with electrical/mechanical/safety specs
4	VBF-T8R1MIMO-CALC-01	calc.xlsx	xlsx	Design calculation sheet (mass, ED, rate, safety)
5	VBF-T8R1MIMO-DVPR-01	dvpr.md	md	Design verification plan and report (virtual test results)
6	VBF-T8R1MIMO-DFMEA-01	dfmea.md	md	Design FMEA (qualitative, 7 failure modes)
7	—	report.html	html	Simulation report (rendered from log.jsonl)
8	VBF-T8R1MIMO-DS-01	design_spec.md	md → pdf	PDF release version (source: design_spec.md)

Notes

- All values sourced from simulation output files (log.jsonl entries and calc-energy output)
- Mass excludes electrolyte and casing (formula-caliber mass per protocol)
- Transport parameters (σ , D , t_+) are domain estimates, not measured values — marked as such in design spec
- PDF export to be completed in post-processing step
