Machine-generated report: report.html (bda render over log.jsonl).

Audit summary (log.jsonl): entry0 criteria | plan (R0, R2 update) | proposes R1-R4 | evaluates R1-R4 (all mechanical log-evaluate; R4 = 4x pass) | endorse (skipped: real_compute=false, cell-level case, no molecular candidates) | final verdict = achieved.

Selected design: R4_F1_Fine2_Tp05_Por32_H80 (see design_spec.md section 2, datasheet).
